Subject: I disagree!

First, I have a BS in Business and a MS in Software Engineering. I'm not a Joe Sixpack. I don't buy this settlement at all. The best course of action was to break MS into 2 companies; an operating system company and an applications company. Then the playing field would be level. Given the US hasn't the moxy to do that, the next best course is very, very strict controls on MS--not the useless controls agreed to.
